**ARCHITECTURAL PROFILES**

*Good design is good business.*

We created the Signature Designs® Architectural Profiles with that statement as our core belief. The program evolved in response to multiple requests from our partner dealers and repeated inquiry from their contractor, designer, homeowner and commercial customers.

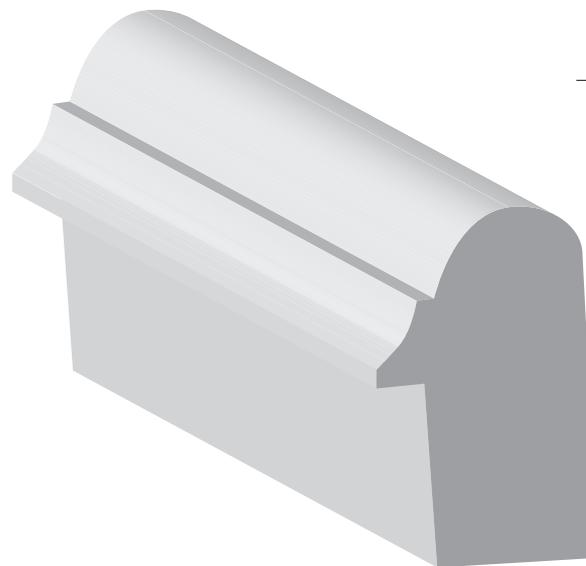

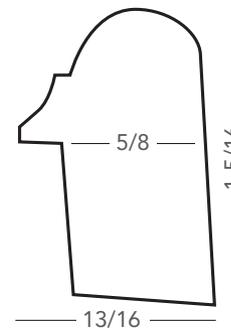

So was born Signature Designs®; a fusion of precisely crafted, exquisitely finished moulding profiles that beautifully complement structures in classic, traditional and regional applications.

You decide what components work for your business. The selected profiles are yours to brand with your name and collection components are yours to highlight as you wish. Signature Designs® is a unique program because you control the product mix and how best to meet your customers' needs and expectations.

Timber Trading Group® is proud to share Signature Designs® with you.
