

ICONTM

DOUGLAS FIR 

THERMALLY MODIFIED
FOR SUSTAINABILITY,
DURABILITY AND
ICONIC BEAUTY.

WE INSPECT EACH PIECE OF WOOD
LIKE OUR REPUTATION DEPENDS
ON IT. BECAUSE IT DOES.

THERMALLY MODIFIED

Our advanced thermal modification process, a closed pressurized system, reduces the moisture content in the wood making it both decay and insect resistant.

BEST IN CLASS WOOD

We start with the highest quality wood available, clear vertical grain Douglas Fir, clear Radiata Pine, and clear Poplar. ICON is clear, defect free and 100% usable.

RIGOROUS INSPECTION

Every piece of ICON™ is inspected to make sure it is 100% usable. Our company has a long history of ensuring our customers always receive material that exceeds their expectations.

DURABLE

Through thermal modification, ICON™ increases durability and dimensional stability. It reduces warping, cupping, and twisting due to seasonal expansion and contraction cycles.

CHEMICAL FREE

ICON™ achieves its superior performance without the use of any chemicals. Our innovative thermal modification process uses only heat and pressure to transform the wood.

SUSTAINABLE

From harvesting to processing, our intention is to create a truly sustainable product. In fact, our modern system has a carbon footprint 4 times smaller than conventional systems.

DON'T JUST MAKE
A STATEMENT.
CREATE AN ICON.

DOUGLAS FIR

ICON is available in the highest quality wood, clear vertical grain Douglas Fir. It's beautiful, sustainable, and comes with an industry leading 25-year warranty.
